

# INSTRUCTIONS SURFBOT

AUG 2011

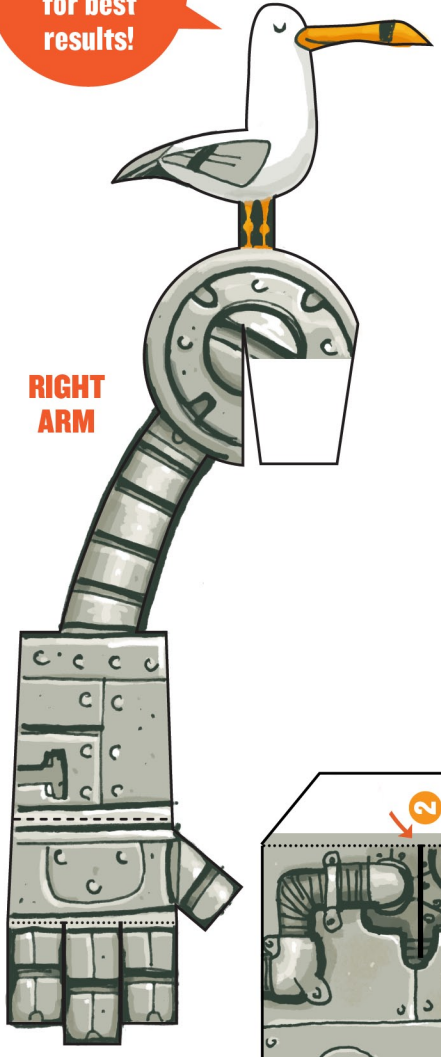

**BUILD YOUR OWN SURFBOT!** It's easy: cut out, fold on dotted lines, and glue in order. Cut the four slits (indicated by arrows) in the body before folding.

**TIP:** You can change Surfbot's left arm to either have a calendar or limerick surfboard! **⚡ WARNING:** Do not expose Surfbot to water. No matter how much he begs do not allow him to surf—it will cause Surfbot to explode!

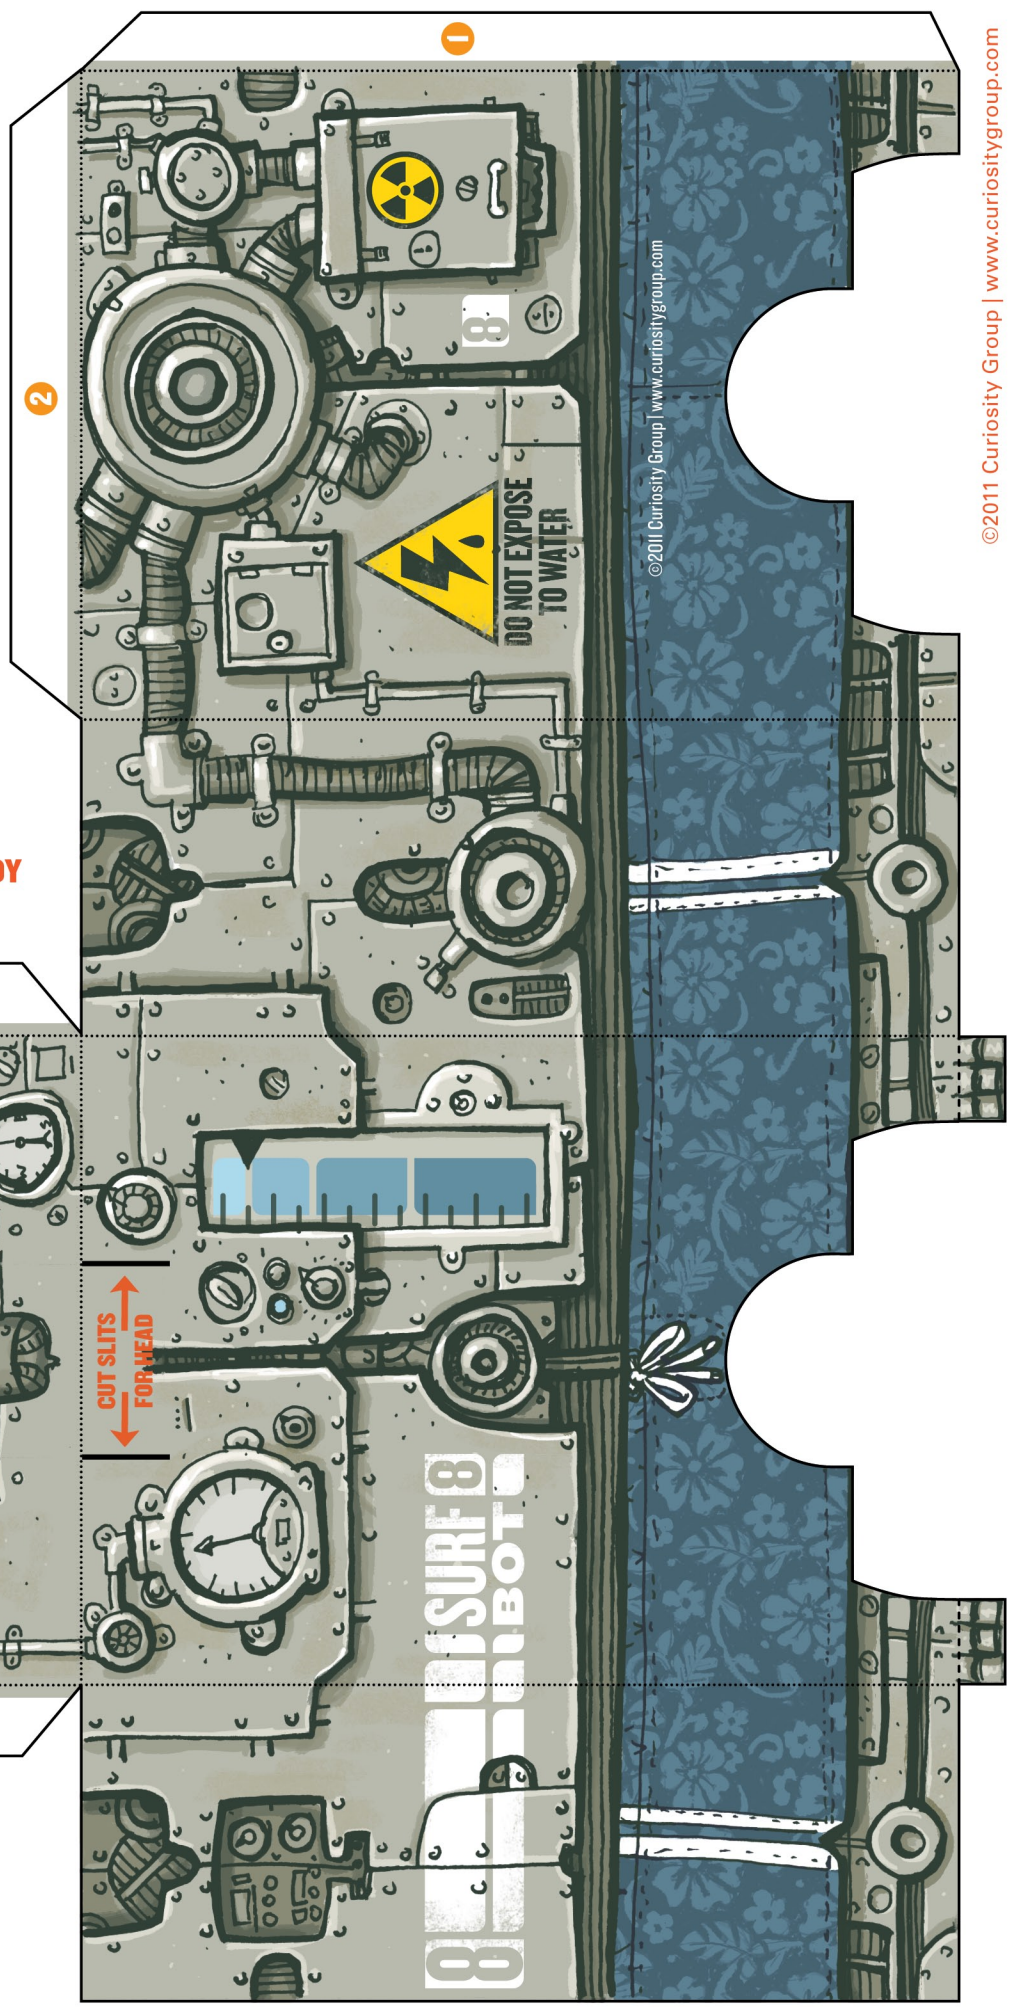

Print on heavy paper for best results!
